AGELESS is a daily topical cream designed to visibly reduce the UV- and age-related effects of inflammaging and photoaging, helping to improve:

- Skin clarity
- A healthier looking complexion
- Skin firmness

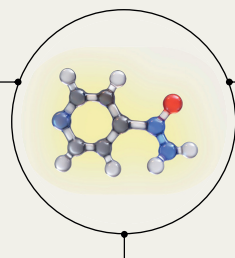

**PROVEN EFFICACY** | For a vibrant, resilient, and luminous skin.

- ✓ **95%** showed visible improvement in signs of photoaging<sup>1</sup>
- ✓ **95%** experienced smoother, more hydrated skin<sup>1</sup>
- ✓ **3x** faster recovery after redness or irritation<sup>3</sup>
- ✓ **86%** noticed a more radiant complexion<sup>3</sup>

## REVEAL RADIANCE

Promotes smoother, brighter, more refined skin by supporting collagen balance and restoring clarity and natural luminosity.

## MODULATE INFLAMMAGING

Helps calm the effects of chronic, low-grade inflammation to reduce sensitivity, support barrier and improve evenness.

## REVERSE PHOTOAGING

Targets the visible effects of UV- and age-related oxidative stress, helping improve texture, hydration, and uneven tone.

## WHO IT'S FOR

- Sensitive, or mature skin
- Skin prone to redness, irritation, or uneven tone
- Ideal post-procedure or alongside pigment correction routines

## HOW TO USE

Apply a thin, even layer once or twice daily to clean, dry skin. Use alone, or after Cyspera INTENSIVE or Cyspera SENSITIVE to enhance pigment correction results.
